Main Page of Project

Aplikacja powstała na zajęciach z przedmiotu Programowanie aplikacja dla technologii mobilnych na Szczecińskim ZUT-cie. Aplikacja służy do wyszukiwania filmów z dowolnego kina, oraz pokazaniu trasy do niej z punktu lokalizacji urządzenia. Aplikacja posiada również mapę w której można wyszukiwać kina lub inne cele, a następnie wyznaczać do nich trasę. Aplikacja automatycznie pobiera dane lokalizacyjne telefonu i wyznacza trasę za pomocą GoogleMaps.

Podział zadań:

Miłosz Kita – Wyświetlanie trasy w mapach Googla, Dokumentacja

Piotr Lapis - Parser, wyświetlanie linków do kin

Tomasz Sobieraj – Pobieranie lokalizacji, Wyszukiwanie w GoogleMaps, Lista z podpowiedziami w wyszukiwaniu w GoogleMaps

Wykorzystane technologie:

GoogleMaps - <https://developers.google.com/maps/documentation/>

GoogleRouts - <https://cloud.google.com/maps-platform/routes/>

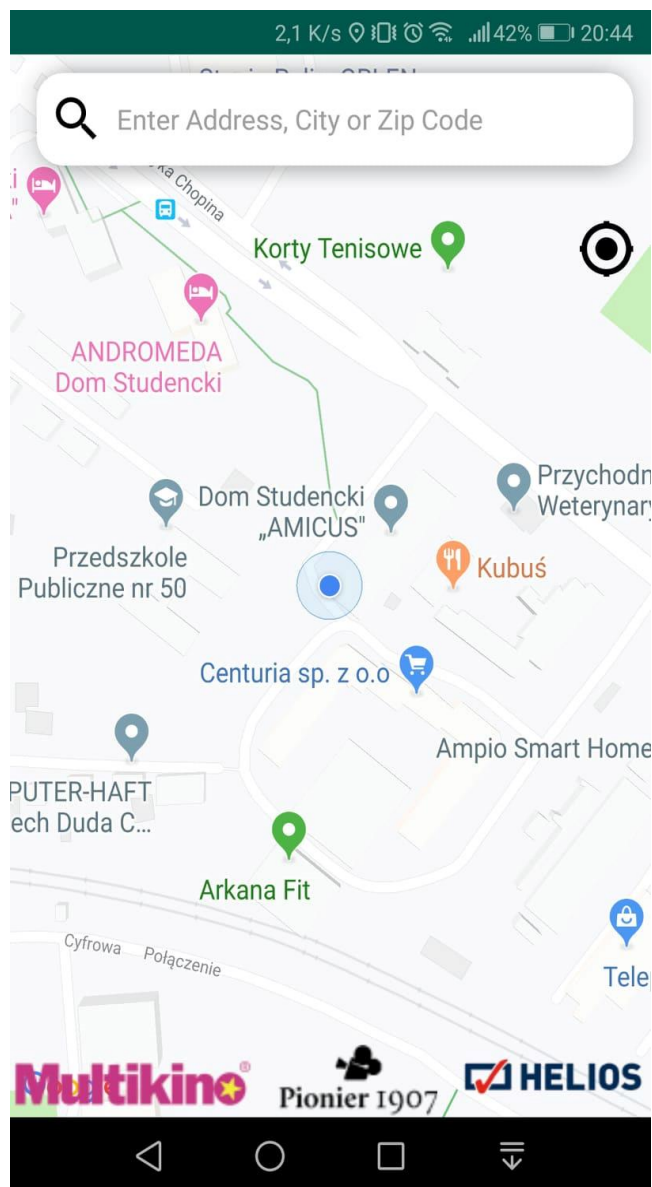

Google Places Api - <https://developers.google.com/places/web-service/intro>

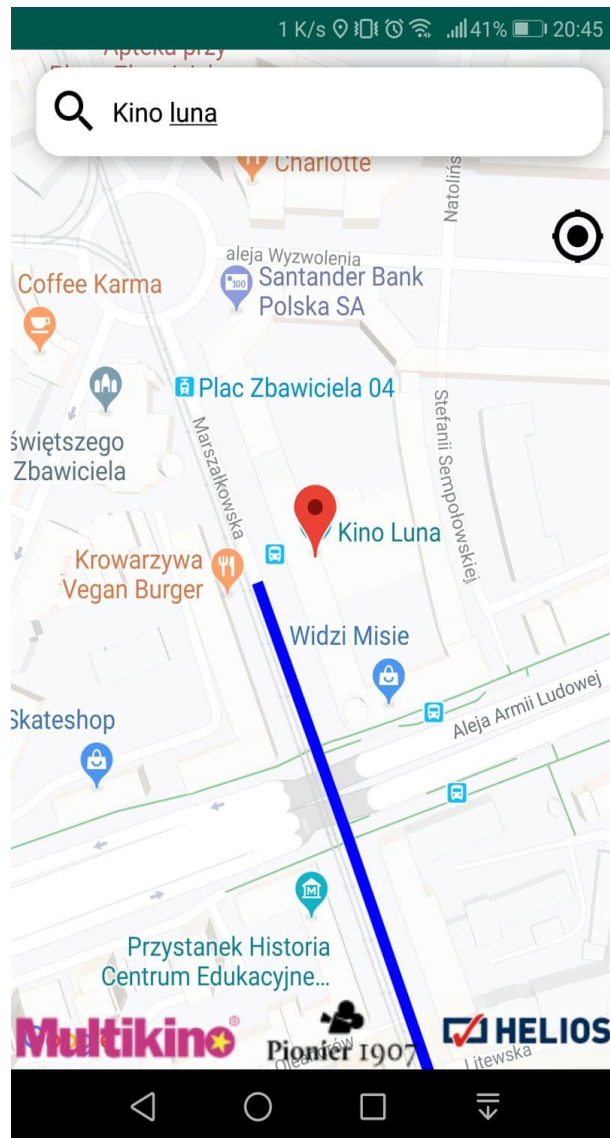

Jsoup - <https://jsoup.org/>

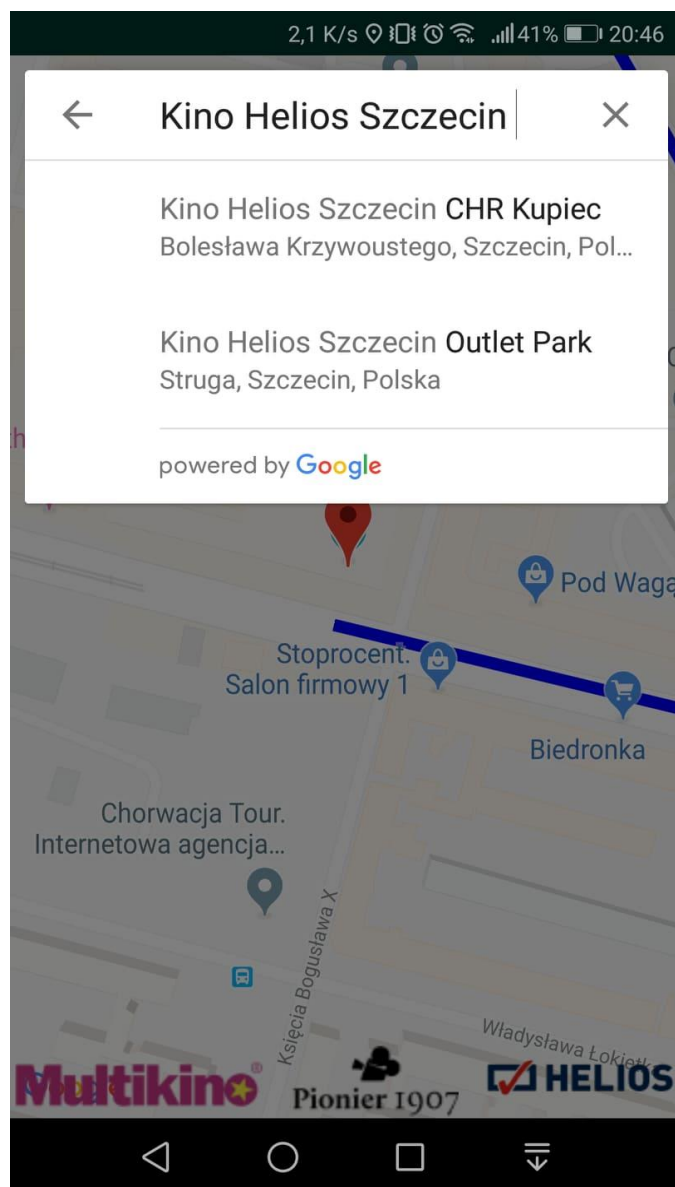

Link do githuba:

https://github.com/Milosz36073/Android_Project

Screeny z gotowej aplikacji

Multikino

Dostępne filmy:

- Avengers: Koniec gry,
- Brightburn: Syn ciemności,
- Chłopiec z burzy,
- Dumbo,
- Gloria Bell,
- Godzilla II: Król potworów,
- John Wick 3,
- Kurier,

Dostępne filmy:

- Laleczka,
- Men in Black International,
- Agent Kot,
- Godzilla II: Król potworów,
- Pokémon Detektyw Pikachu,
- Paskudy. UglyDolls,
- Rocketman.

com.example.myapplication.directionhelpers.DataParser Class Reference

Collaboration diagram for com.example.myapplication.directionhelpers.DataParser:

Public Member Functions

- List< List< HashMap< String, String > > > **parse** (JSONObject jObject)

Private Member Functions

- List< LatLng > **decodePoly** (String encoded)

Detailed Description

Klasa parsująca stringa z GoogleMaps do Json

Definition at line 16 of file DataParser.java.

Member Function Documentation

List<LatLng> com.example.myapplication.directionhelpers.DataParser.decodePoly (String encoded) [private]

Method to decode polyline points Courtesy :
<https://jeffreysambells.com/2010/05/27/decoding-polylines-from-google-maps-direction-api-with-java>

Definition at line 63 of file DataParser.java.

Here is the caller graph for this function:

List<List<HashMap<String, String> > >

com.example.myapplication.directionhelpers.DataParser.parse (JSONObject jObject)

Traversing all routes

Traversing all legs

Traversing all steps

Traversing all points

Definition at line 17 of file DataParser.java.

Here is the call graph for this function:

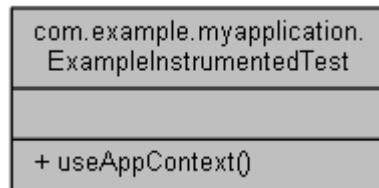

The documentation for this class was generated from the following file:

- D:/APKA/APKA/app/src/main/java/com/example/myapplication/directionhelpers/**DataParser.java**

com.example.myapplication.ExampleInstrumentedTest Class Reference

Collaboration diagram for com.example.myapplication.ExampleInstrumentedTest:

Public Member Functions

- `void useAppContext ()`

Detailed Description

Instrumented test, which will execute on an Android device.

See also:

[Testing documentation](#)

Definition at line 18 of file `ExampleInstrumentedTest.java`.

Member Function Documentation

`void com.example.myapplication.ExampleInstrumentedTest.useAppContext ()`

Definition at line 20 of file `ExampleInstrumentedTest.java`.

The documentation for this class was generated from the following file:

- `D:/APKA/APKA/app/src/androidTest/java/com/example/myapplication/ExampleInstrumentedTest.java`

com.example.myapplication.ExampleUnitTest Class Reference

Collaboration diagram for com.example.myapplication.ExampleUnitTest:

Public Member Functions

- void `addition_isCorrect()`

Detailed Description

Example local unit test, which will execute on the development machine (host).

See also:

[Testing documentation](#)

Definition at line 12 of file `ExampleUnitTest.java`.

Member Function Documentation

void com.example.myapplication.ExampleUnitTest.addition_isCorrect ()

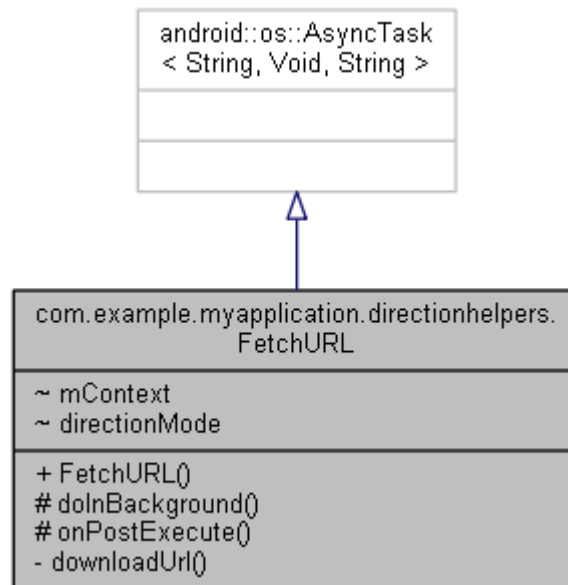

Definition at line 14 of file `ExampleUnitTest.java`.

The documentation for this class was generated from the following file:

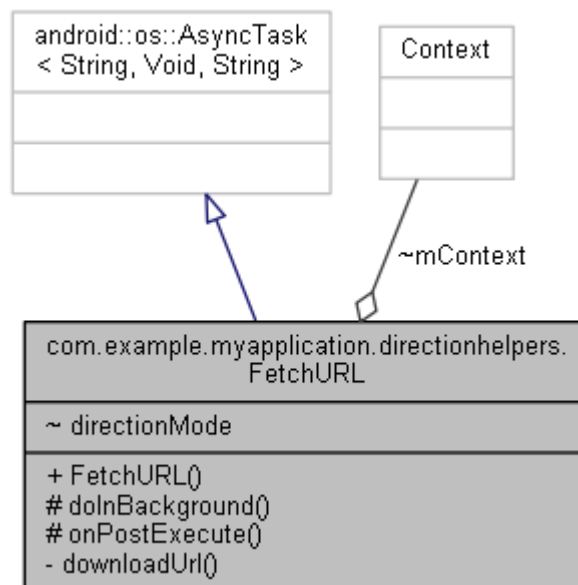

- `D:/APKA/APKA/app/src/test/java/com/example/myapplication/ExampleUnitTest.java`

com.example.myapplication.directionhelpers.FetchURL Class Reference

Inheritance diagram for com.example.myapplication.directionhelpers.FetchURL:

Collaboration diagram for com.example.myapplication.directionhelpers.FetchURL:

Public Member Functions

- `FetchURL (Context mContext)`

Protected Member Functions

- `String doInBackground (String... strings)`
- `void onPostExecute (String s)`

Package Attributes

- `Context mContext`

- String **directionMode** = "driving"

Private Member Functions

- String **downloadUrl** (String strUrl) throws IOException

Detailed Description

Klasa scalająca wyznaczanie trasy i wyciąga dane ze sparsowanego stringa

Definition at line 18 of file FetchURL.java.

Constructor & Destructor Documentation

com.example.myapplication.directionhelpers.FetchURL.FetchURL (Context mContext)

Definition at line 22 of file FetchURL.java.

Member Function Documentation

String com.example.myapplication.directionhelpers.FetchURL.doInBackground (String... strings) [protected]

Definition at line 27 of file FetchURL.java.

Here is the call graph for this function:

String com.example.myapplication.directionhelpers.FetchURL.downloadUrl (String strUrl) throws IOException [private]

Definition at line 49 of file FetchURL.java.

Here is the caller graph for this function:

void com.example.myapplication.directionhelpers.FetchURL.onPostExecute (String s) [protected]

Definition at line 42 of file FetchURL.java.

Member Data Documentation

String com.example.myapplication.directionhelpers.FetchURL.directionMode = "driving" [package]

Definition at line 20 of file FetchURL.java.

Context com.example.myapplication.directionhelpers.FetchURL.mContext [package]

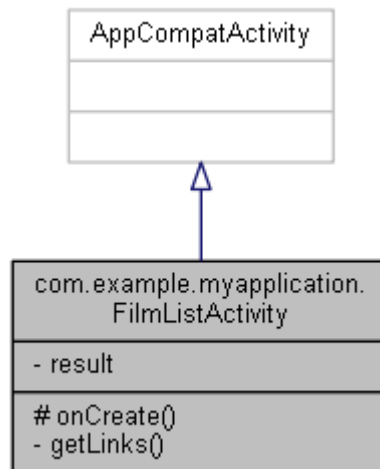

Definition at line 19 of file FetchURL.java.

The documentation for this class was generated from the following file:

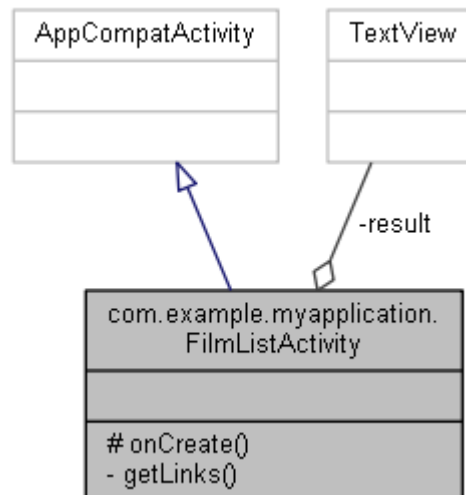

- **D:/APKA/APKA/app/src/main/java/com/example/myapplication/directionhelpers/FetchURL.java**

com.example.myapplication.FilmListActivity Class Reference

Inheritance diagram for com.example.myapplication.FilmListActivity:

Collaboration diagram for com.example.myapplication.FilmListActivity:

Protected Member Functions

- `void onCreate` (Bundle savedInstanceState)

Private Member Functions

- `void getLinks ()`
Metoda pobierająca linki ze stron internetowych kin.

Private Attributes

- `TextView result`
Zmienna typu TextView przechowująca listę dostępnych filmów.

Detailed Description

Klasa wyświetlająca wszystkie dostępne filmy

Definition at line 15 of file FilmListActivity.java.

Member Function Documentation

void com.example.myapplication.FilmListActivity.getLinks () [private]

Metoda pobierająca linki ze stron internetowych kin.

Definition at line 31 of file FilmListActivity.java.

Here is the caller graph for this function:

void com.example.myapplication.FilmListActivity.onCreate (Bundle savedInstanceState) [protected]

Definition at line 20 of file FilmListActivity.java.

Here is the call graph for this function:

Member Data Documentation

TextView com.example.myapplication.FilmListActivity.result [private]

Zmienna typu TextView *przechowująca listę dostępnych filmów*.

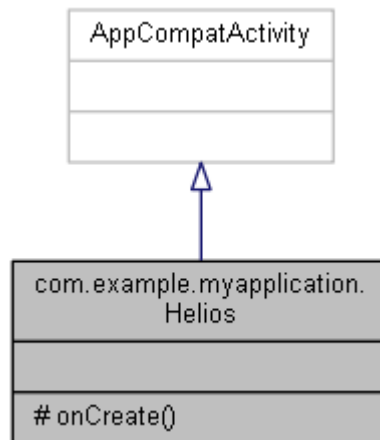

Definition at line 17 of file FilmListActivity.java.

The documentation for this class was generated from the following file:

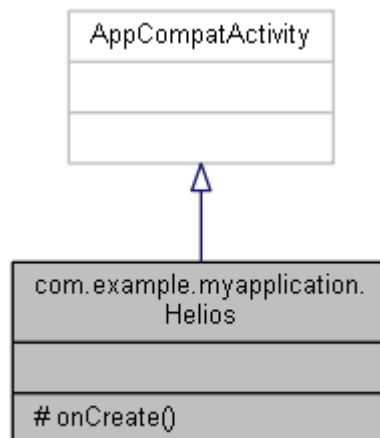

- D:/APKA/APKA/app/src/main/java/com/example/myapplication/**FilmListActivity.java**

com.example.myapplication.Helios Class Reference

Inheritance diagram for com.example.myapplication.Helios:

Collaboration diagram for com.example.myapplication.Helios:

Protected Member Functions

- `void onCreate (Bundle savedInstanceState)`

Detailed Description

Klasa wyświetlająca listę filmów wraz z linkami z wybranego kina tj. **Helios**

Definition at line 17 of file `Helios.java`.

Member Function Documentation

`void com.example.myapplication.Helios.onCreate (Bundle savedInstanceState) [protected]`

Zmienna typu `String` przechowująca listę z danymi filmami z kina **Helios**

Wyznaczanie linków do jakich ma się odnieść po kliknięciu

Wyznaczanie liter stringa danego filmu które mają być klikane

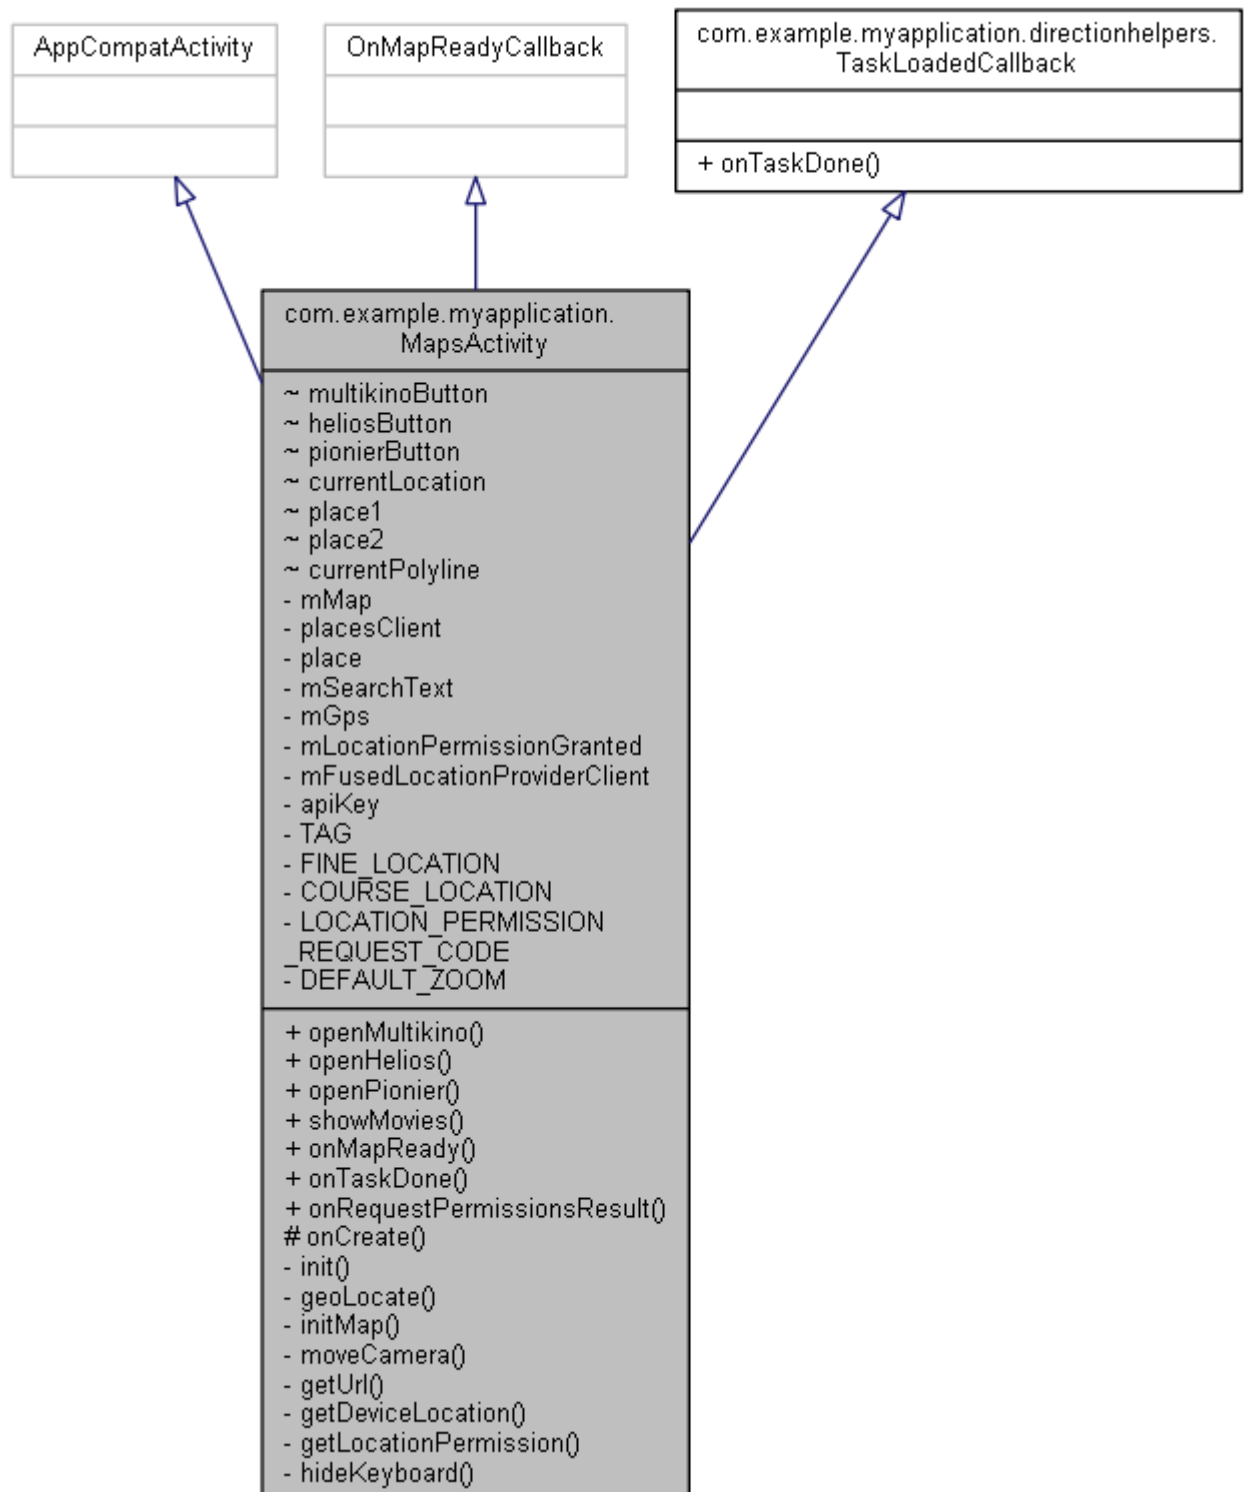

Definition at line 20 of file Helios.java.

The documentation for this class was generated from the following file:

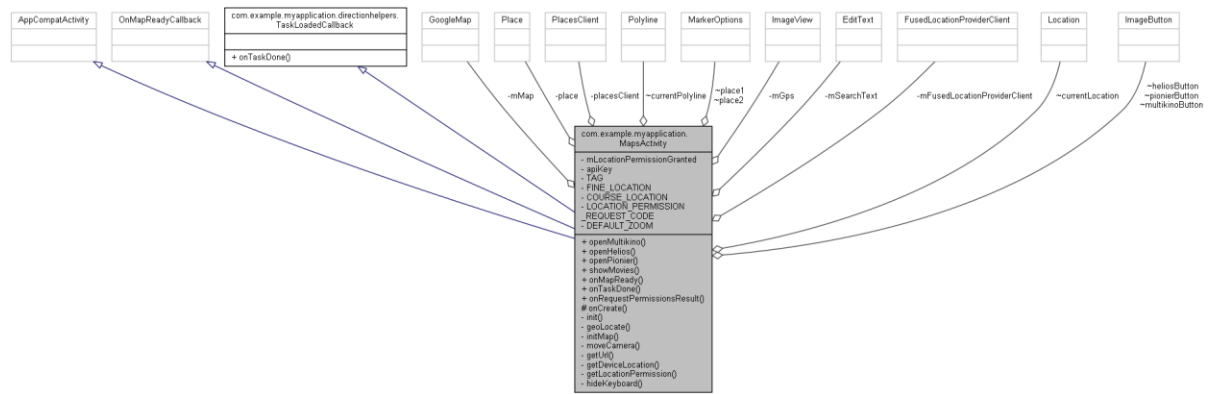

- D:/APKA/APKA/app/src/main/java/com/example/myapplication/**Helios.java**

com.example.myapplication.MainActivity Class Reference

Inheritance diagram for com.example.myapplication.MainActivity:

Collaboration diagram for com.example.myapplication.MainActivity:

Public Member Functions

- void **openMultikino ()**
Metoda wywołuje nowe activity z linkami z kina **Multikino**.
- void **openHelios ()**
Metoda wywołuje nowe activity z linkami z kina **Helios**.
- void **openPionier ()**
Metoda wywołuje nowe activity z linkami z kina **Pionier**.
- void **showMovies** (HashSet movies)
Metoda wywołuje nowe activity z linkami do filmów wszystkich dostępnych kin.
- void **onMapReady** (GoogleMap googleMap)
Metoda sprawdzająca włączoną lokalizację urządzenia.
- void **onTaskDone** (Object... values)
Metoda służąca do dodawania znaczników na mapie.
- void **onRequestPermissionsResult** (int requestCode, @NonNull String[] permissions, @NonNull int[] grantResults)

Protected Member Functions

- void **onCreate** (Bundle savedInstanceState)

Package Attributes

- ImageButton **multikinoButton**
*Ikona kina **Multikino**.*
- ImageButton **heliosButton**
*Ikona kina **Helios**.*
- ImageButton **pionierButton**
*Ikona kina **Pionier**.*
- Location **currentLocation**
Aktualne współrzędne urządzenia.

- MarkerOptions **place1**
- MarkerOptions **place2**
Punkty do wyznaczania trasy pomiędzy nimi.
- Polyline **currentPolyline**
Obecny punkt ze współrzędnych urządzenia.

Private Member Functions

- void **init** ()
Metoda Metoda inicjalizująca.
- void **geoLocate** ()
Metoda służąca do odnajdywania i pobierania danych z punktu.
- void **initMap** ()
Metoda inicjalizująca GoogleMaps.
- void **moveCamera** (LatLng latLng, float zoom, String title)
Metoda służąca do przesuwania kamery mapy do wyszukanego punktu.
- String **getUrl** (LatLng origin, LatLng dest, String directionMode)
Metoda służąca do wyznaczania drogi z dwóch punktów w za pomocą GoogleMaps.
- void **getDeviceLocation** ()
Metoda służąca do pobrania lokalizacji urządzenia.
- void **getLocationPermission** ()
Metoda służąca do zapytania urządzenia dostępie do lokalizacji.
- void **hideKeyboard** ()
Metoda służąca chowaniu się klawiatury po wyszukaniu danego elementu.

Private Attributes

- GoogleMap **mMap**
- PlacesClient **placesClient**
- Place **place**
- EditText **mSearchText**
Pole do wyszukiwania punktów na mapie.
- ImageView **mGps**
okno nawigacji
- Boolean **mLocationPermissionGranted** = false
- FusedLocationProviderClient **mFusedLocationProviderClient**

Static Private Attributes

- static final String **apiKey** = "AIzaSyDEwKJsjanggTqr_CGk3a0jkY43NVdVHOQ"
- static final String **TAG** = MapsActivity.class.getSimpleName()
- static final String **FINE_LOCATION** = Manifest.permission.ACCESS_FINE_LOCATION

- static final String **COURSE_LOCATION** = Manifest.permission.ACCESS_COARSE_LOCATION
- static final int **LOCATION_PERMISSION_REQUEST_CODE** = 1254
- static final float **DEFAULT_ZOOM** = 17f

Detailed Description

Główna klasa aplikacji *służąca* do sterowania logiką aplikacji. Zawiera parser, obsługę Google Maps oraz przekierowania do widoków.

Definition at line 61 of file MapsActivity.java.

Member Function Documentation

void com.example.myapplication.MainActivity.geoLocate () [private]

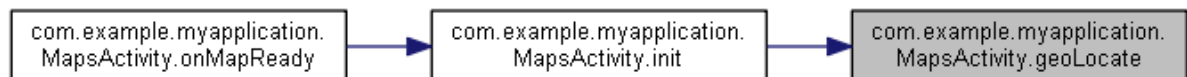

Metoda służąca do odnajdywania i pobierania danych z punktu.

Definition at line 161 of file MapsActivity.java.

Here is the call graph for this function:

Here is the caller graph for this function:

void com.example.myapplication.MainActivity.getDeviceLocation () [private]

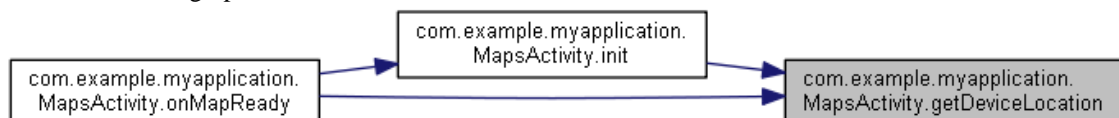

Metoda służąca do pobrania lokalizacji urządzenia.

Definition at line 329 of file MapsActivity.java.

Here is the call graph for this function:

Here is the caller graph for this function:

void com.example.myapplication.MainActivity.getLocationPermission () [private]

Metoda służąca do zapytania urządzenia o dostęp do lokalizacji.

Definition at line 364 of file MapsActivity.java.

Here is the call graph for this function:

Here is the caller graph for this function:

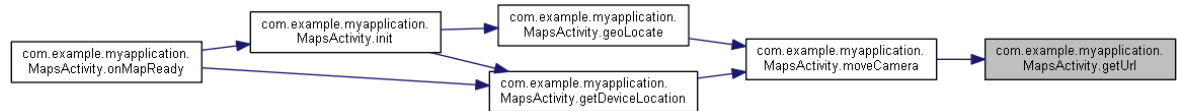

String com.example.myapplication.MapsActivity.getUrl (LatLng *origin*, LatLng *dest*, String *directionMode*) [private]

Metoda służąca do wyznaczania drogi z dwóch punktów w za pomocą GoogleMaps.

Definition at line 309 of file MapsActivity.java.

Here is the caller graph for this function:

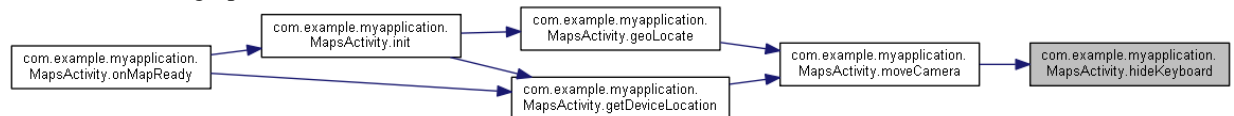

void com.example.myapplication.MapsActivity.hideKeyboard () [private]

Metoda służąca chowaniu się klawiatury po wyszukaniu danego elementu.

Definition at line 415 of file MapsActivity.java.

Here is the caller graph for this function:

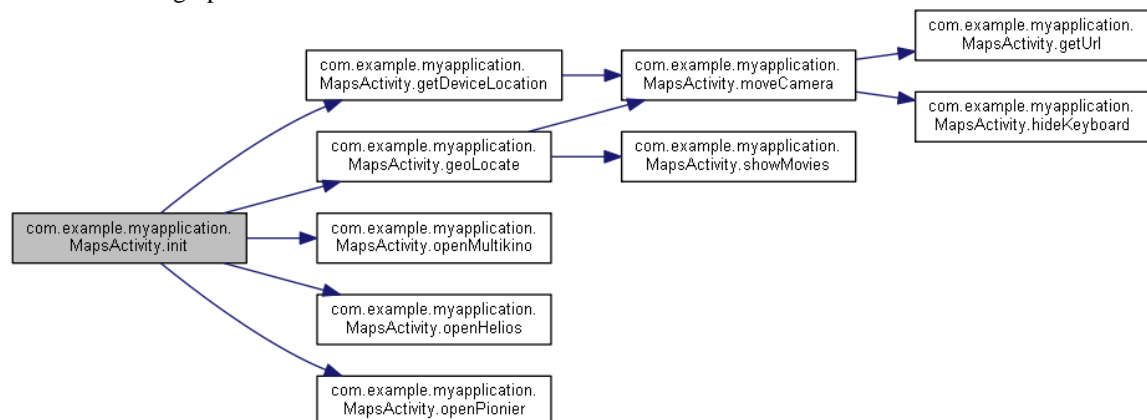

void com.example.myapplication.MapsActivity.init () [private]

Metoda inicjalizująca.

Definition at line 111 of file MapsActivity.java.

Here is the call graph for this function:

Here is the caller graph for this function:

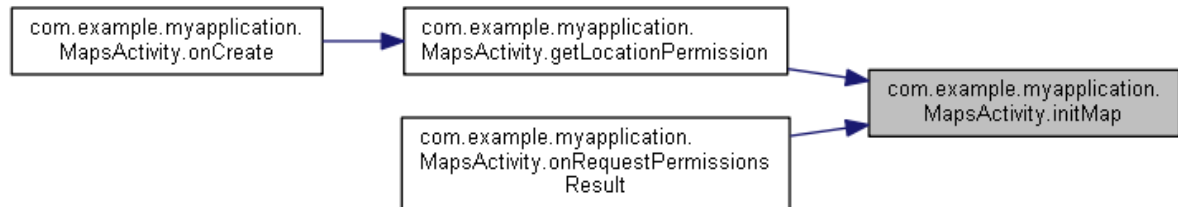

void com.example.myapplication.MainActivity.initMap () [private]

Metoda inicjalizująca GoogleMaps.

Definition at line 253 of file MainActivity.java.

Here is the caller graph for this function:

void com.example.myapplication.MainActivity.moveCamera (LatLng latLng, float zoom, String title) [private]

Metoda służąca do przesuwania kamery mapy do wyszukanego punktu.

Definition at line 285 of file MainActivity.java.

Here is the call graph for this function:

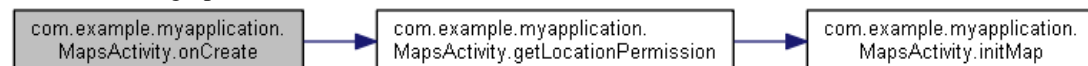

Here is the caller graph for this function:

void com.example.myapplication.MainActivity.onCreate (Bundle savedInstanceState) [protected]

Definition at line 94 of file MainActivity.java.

Here is the call graph for this function:

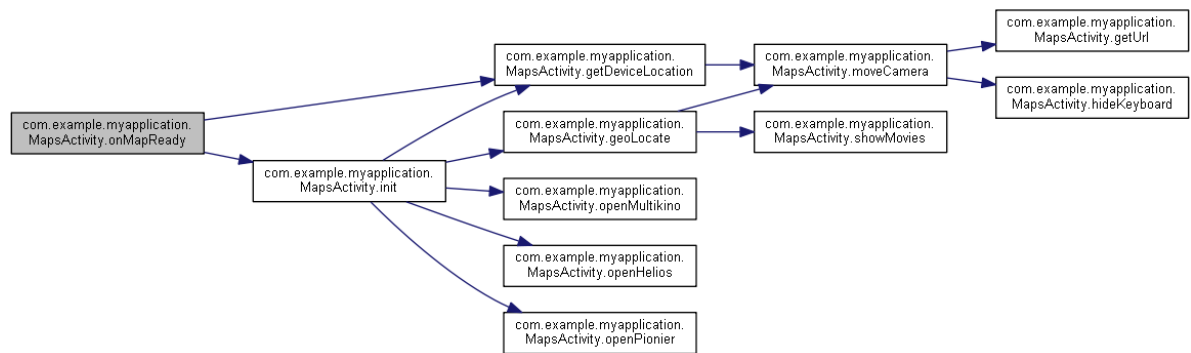

void com.example.myapplication.MainActivity.onMapReady (GoogleMap googleMap)

Metoda sprawdza włączoną lokalizację urządzenia.

Definition at line 264 of file MainActivity.java.

Here is the call graph for this function:

void com.example.myapplication.MainActivity.onRequestPermissionsResult (int requestCode, @NonNull String [] permissions, @NonNull int [] grantResults)

Definition at line 389 of file MainActivity.java.

Here is the call graph for this function:

void com.example.myapplication.MainActivity.onTaskDone (Object... values)

Metoda służąca do dodawania znaczników na mapie.

Implements **com.example.myapplication.directionhelpers.TaskLoadedCallback** (p.47).

Definition at line 355 of file MainActivity.java.

void com.example.myapplication.MainActivity.openHelios ()

Metoda wywołuje nowe activity z linkami z kina **Helios**.

Definition at line 142 of file MainActivity.java.

Here is the caller graph for this function:

void com.example.myapplication.MainActivity.openMultikino ()

Metoda wywołuje nowe activity z linkami z kina **Multikino**.

Definition at line 136 of file MainActivity.java.

Here is the caller graph for this function:

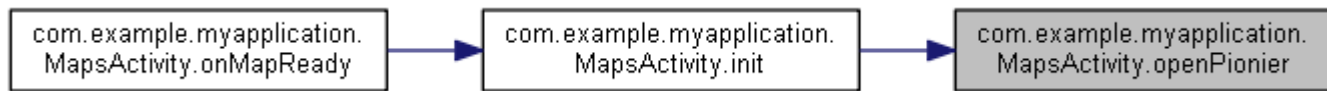

void com.example.myapplication.MainActivity.openPionier ()

Metoda wywołuje nowe activity z linkami z kina **Pionier**.

Definition at line 148 of file MainActivity.java.

Here is the caller graph for this function:

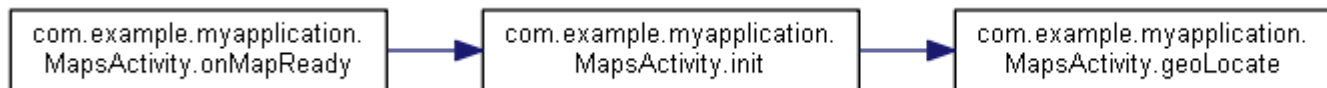

void com.example.myapplication.MainActivity.showMovies (HashSet *movies*)

Metoda wywołuje nowe activity z linkami do filmów wszystkich dostępnych kin.

Definition at line 154 of file MapsActivity.java.

Here is the caller graph for this function:
